Dear Hiring Manager,

I am writing to express my interest in opportunities within the realm of front-end development, particularly those that leverage my expertise in React.js, JavaScript, and modern testing frameworks. With over four years of experience as a Software Engineer at Wipro, I have honed my skills in creating responsive and user-friendly web applications, while also focusing on performance enhancements and security solutions.

During my tenure at Wipro, I successfully led the development of scalable web applications, addressing critical UI issues and performance bottlenecks. My role involved collaborating with cross-functional teams to align project goals with client expectations, conducting security assessments, and implementing enhancements to protect user data. Notably, I contributed to significant projects such as the Nokia 1830 Simulator and the SABIC dashboard, where I integrated modern UI frameworks and ensured seamless user experiences across devices.

I am particularly passionate about utilising my skills in security testing and performance optimisation to contribute to innovative software solutions. My technical proficiency in CSS3, Bootstrap, and automated testing tools like Playwright and Cypress further complements my front-end development capabilities.

I am eager to bring my experience and dedication to a dynamic team that values quality and innovation. Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your organisation.

Sincerely,

Utkarsh Kapoor
